

Table 3. Portfolio architecture persistence, 2023Q4-2025Q4

Channel	N	Pearson r	Spearman ρ	Kendall τ	ICC(3,1)	Reliability
Internal financial capacity	54	0.764	0.733	0.575	0.853	Good
External financing dependence	56	0.955	0.931	0.821	0.961	Excellent
Growth-duration exposure	56	0.763	0.765	0.611	0.818	Good
Portfolio concentration	56	0.928	0.920	0.761	0.951	Excellent
Financial architecture risk	56	0.918	0.897	0.739	0.922	Excellent
Extended architecture risk	56	0.925	0.916	0.762	0.927	Excellent

Note. ICC(3,1) is a two-way mixed-effects consistency measure across the three snapshots. Reliability follows the conventional 0.75 and 0.90 thresholds.
